

## Worldwide Network

CBOL is a supplier of critical fasteners to OEMs. Our manufacturing network provides a broad spectrum of externally-threaded, internally-threaded and cold-headed fasteners to the aerospace, automotive and industrial manufacturing industries. We utilize the latest technologies to produce high strength, critical tolerance parts that meet the most demanding OEM specifications. CBOL's certified partners are continually applying their research and development efforts to new product designs and innovative advances in production technology.

## Wide Variety and High Capacity

CBOL's extensive network of manufacturing partners allows us to source thousands of types of fasteners, including hot- and cold-forged parts, for a broad range of applications. CBOL customer service representatives and product engineers work with you from concept to blueprint to first article and production, ensuring that your parts will meet your exact specification. Our facilities have the capacity to produce hundreds of millions of pieces per month, all with uniform quality.

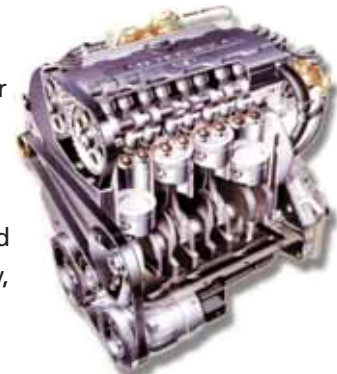

## Value-Added

At CBOL, we are able to provide added value through second and third stage processing such as precision machining, plating and assembly work. Whether you require special packaging, labeling, consignment terms or Just-In-Time delivery, we are ready to design a supply package that meets your needs and reduces your overall product cost.

## Certified Quality

Industry requirements increasingly call for highly specialized parts and accompanying documentation that certifies manufacturing processes to domestic and international standards. Each critical fastener is engineered to meet these standards for quality, reliability, durability and traceability. Our facilities are QS 9000 and ISO 9001 quality certified with capabilities to generate PPAP and process control documentation by utilizing electronic monitoring devices. Our quality control objective is zero defects beyond Six Sigma.

*CBOL Corporation... offering U.S. customers cost savings through participation in the global market.*

# CRITICAL FASTENERS

## Applications

- |                  |                         |
|------------------|-------------------------|
| Engine           | Electronic Product Assy |
| Brake Systems    | Body and Chassis Assy   |
| Steering Systems | Drive Train Systems     |

## Bolts and Screws

- |                        |                                    |                |
|------------------------|------------------------------------|----------------|
| ▶ Cylinder Head Bolt   | ▶ Tie Rod Pins                     | ▶ Ball Studs   |
| ▶ Bearing Cap Bolt     | ▶ Self-Clenching Screws            | ▶ Sems         |
| ▶ Con Rod Bolt         | ▶ Plug Bolts                       | ▶ Pins         |
| ▶ Pulley Lock Bolt     | ▶ Flywheel Bolts                   | ▶ Washers      |
| ▶ Hub Bolt             | ▶ Hex Stud Bolts                   | ▶ Stator Bolts |
| ▶ Tie Rod Bolt         | ▶ Hex Socket Bolts                 |                |
| ▶ Washer Assy Hex Bolt | ▶ Hose Bend Screws                 |                |
| ▶ Flange Bolt          | ▶ Refrigerator Compressor Bolts    |                |
| ▶ Stud Bolt            | ▶ Machine, Tapping, Taptite Screws |                |

## Nuts and Other Parts

- |   |                 |
|---|-----------------|
| ▶ Hex Nuts (standard, heavy, jam, high, long) |                 |
| ▶ Weld Nut                                    | ▶ Nylon Nut     |
| ▶ Con Rod Nut                                 | ▶ Pipe Nut      |
| ▶ Self-Locking Nut                            | ▶ Seat Belt Nut |
| ▶ Flange Nut                                  | ▶ Round Nut     |
| ▶ Slotted Nut                                 | ▶ Square Nut    |
| ▶ Wheel (Hub) Nut                             | ▶ Combi Nut     |
| ▶ Wiper Cap Nut                               | ▶ Castle Nut    |

- ▶ Piston Pin
- ▶ Tappet Engine Valve
- ▶ Joint Oil Filter
- ▶ Neck Ring, Eye Ring
- ▶ Wheel Bearing
- ▶ Cap Valve
- ▶ Ring

### Local Purchasing – International Sourcing

CBOL Corporation is a U.S.-based full service provider supplying high quality, precision manufactured products and engineering services to its OEM customers in the automotive, aerospace, defense and electronics industries. CBOL offers U.S. customers turnkey production of quality products at significant cost savings realized through active participation in the global manufacturing market.

### Certified Quality

CBOL assures quality to its customers by offering products from manufacturing facilities with ISO 9000 and QS 9000 certification.

### Delivered To Your Dock

CBOL coordinates all ocean, air and ground transportation as well as required import duties and customs clearance documentation. Our buying power allows us to achieve lower freight costs by consolidating shipping containers. We ship all products directly to your loading dock according to a designated shipping schedule.
