

Worldwide Network

CBOL supplies high reliability printed circuit boards, cables, wire harnesses and complex electronic sub-assemblies from a global network of manufacturing partners. We serve OEM customers in the commercial, industrial and consumer markets. Our U.S.-based Celltron division has achieved certified supplier status for many commercial and defense customers who have custom wiring needs.

Custom Requirements – Rapid Turnaround

CBOL employs automated and semi-automated equipment combined with Lean Manufacturing principles to deliver high quality wire assemblies for critical fit and ruggedized applications. We are able to produce single-sided, double-sided, multi-layer, rigid and flexible printed circuit boards with up to 42 layers and down to 0.3 mm thick. Rapid prototyping and design revision make us highly responsive to your product specifications and schedule changes. Our products exceed MIL-I-45208 inspection requirements and meet ANSI/J-STD-001 and MIL-STD-2000 soldering requirements.

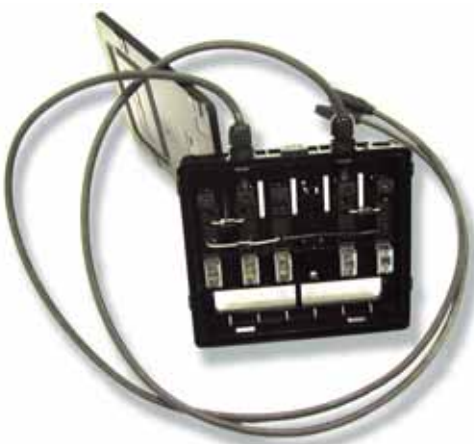

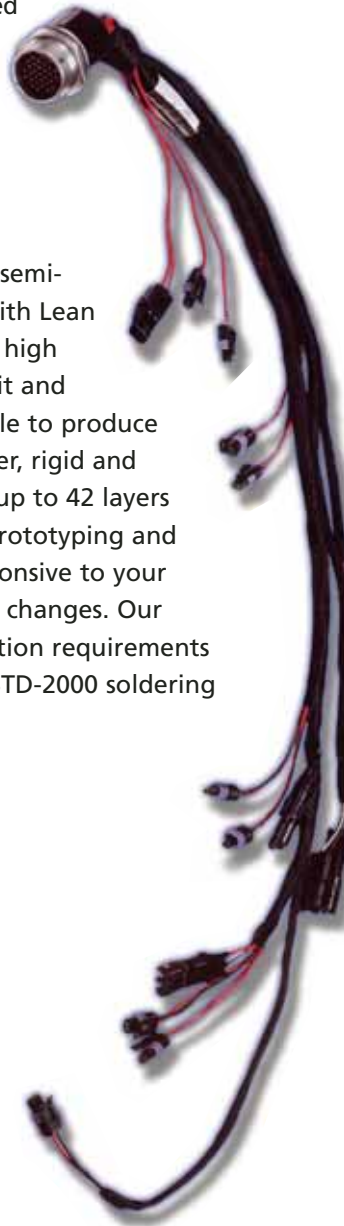

Value-Added

CBOL's value-added services include engineering and design assistance, custom prototyping and rapid revision response. A CBOL specialist can work with you from concept to blueprint to first article and production, ensuring that each part meets your precise requirements. And whether you require special packaging, labeling, consignment terms or Just-In-Time delivery, we are ready to design a supply package that meets your needs and reduces your overall product cost.

Certified Quality

The products produced by CBOL's manufacturing partners are certified to meet domestic and international standards for manufacturing and quality control. Each facility is QS 9000 and ISO 9001 quality certified with capabilities to generate PPAP and process control documentation. Celltron utilizes Statistical Process Control and 100% electrical testing. Our quality control objective is zero defects beyond Six Sigma.

CBOL Corporation... offering U.S. customers cost savings through participation in the global market.

Your Worldwide Parts Resource

Buy Global – Depend on

PCBs and WIRE HARNESSES

Applications / Markets

Commercial	Computer
Aerospace	Telecommunications
Defense	Home Appliance
Automotive	Construction Equipment

Printed Circuit Boards

Single-sided
Double-sided
Multi-layer
Rigid and Flexible
Plating through hole

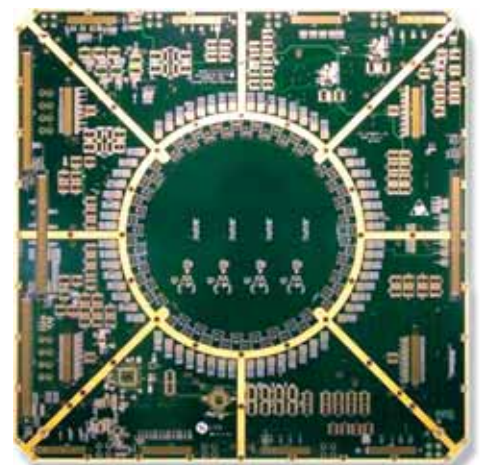

Up to 42 layers
Minimum thickness to 0.3 mm
5 Line per Channel fine pattern
0.075 mm line width and
.20 mm minimum hole size

Wire Harnesses and Assemblies

Discrete Wiring
Molded Cable Assemblies
Multiple Breakout Wiring Harnesses
Electro-Mechanical Sub-assemblies
Data Transmission Cables
Molded Ribbon Cables and Harnesses
Coil Cord Assemblies
Coaxial Cables
Panel Assemblies
Planetary Cabling
EMI Shielded Assemblies

Exceeds MIL-I-45208
ANSI/J-STD-001
MIL-STD-2000

Local Purchasing – International Sourcing

CBOL Corporation is a U.S.-based full service provider supplying high quality, precision manufactured products and engineering services to its OEM customers in the automotive, aerospace, defense and electronics industries. CBOL offers U.S. customers turnkey production of quality products at significant cost savings realized through active participation in the global manufacturing market.

Certified Quality

CBOL assures quality to its customers by offering products from manufacturing facilities with ISO 9000 and QS 9000 certification.

Delivered To Your Dock

CBOL coordinates all ocean, air and ground transportation as well as required import duties and customs clearance documentation. Our buying power allows us to achieve lower freight costs by consolidating shipping containers. We ship all products directly to your loading dock according to a designated shipping schedule.
